Company Type: Medical Device Manufacturing  
Job Position: Full time  
Job Location: Fremont, CA

We are seeking a full time Clinical Trainer.

**Job Summary:**

The Clinical Trainer will be responsible for training the surgeon and operating room (OR) staff on system operation for Hip and Knee replacement surgery. Clinical training will include providing the surgeon and OR staff technical assistance during actual surgical procedures with the product. Candidate must be able to work in a fast paced, high stress environment. Previous operating room experience required. Must have proven experience in presenting technical information to small groups.

**Travel Requirements:**

This position will require extensive domestic and international travel (35% or more). It is based at our Corporate Headquarters in Fremont, CA.

**Job Responsibilities:**

- Train orthopedic surgeons and operating room staff on all aspects of the ROBODOC® Surgical System to establish complete product adoption and high utilization.
- Provide technical assistance during total joint replacement surgical procedures.
- Refine established customer clinical training program and process for the ROBODOC® Surgical System to adapt to ongoing changes to this platform- technology product.
- Assist in creating training materials for other Curexo Clinical Trainer employees.
- Lead the training program for other Curexo Clinical Trainer employees.
- Support the field sales team by training them on ORTHODOC® and ROBODOC® components on a regular basis to advance their product knowledge and selling skills.
- Assist the field sales team in demonstrating the product to surgeons, other customer prospects, and headquarter visitors at customer sites, trade shows and HQ offices.
- Represent the company with the highest levels of professionalism to maintain our market brand/image as a world leader in medical robotics.
- Continue to advance knowledge base and become a clinical expert on all clinical aspects of the ROBODOC® Surgical System including the ORTHODOC® 3D planning workstation and the ROBODOC® Surgical Instrument.

**Qualifications:**

- 
- Bachelor degree in science or related field.
  - 1-2 years Operating Room clinical support experience.
  - Excellent verbal and written, interpersonal and presentation communication skills.
  - Must be capable of making decisions quickly in a high pressure setting.
  - Must demonstrate confidence, trust and a high level of product knowledge.
  - Excellent organizational skills and attention to detail.
  - Strong analytical skills, initiative, judgment and problem solving ability.
  - Excellent computer skills, including Windows, word processing, spreadsheet, and presentation software.
  - High level of integrity and work ethic.
  - Experience with orthopedic instrumentation systems, surgical robotics or surgical navigation systems a plus.

**Curexo Technology Corporation** offers a fast-paced work environment, very competitive compensation, medical and 401K retirement plan benefits.

We are an equal opportunity employer and encourage diversity.

To apply: Please submit resume and Cover Letter to HR dept at [jobs@robodoc.com](mailto:jobs@robodoc.com)

**Company Overview:**

The Company is a pioneer in medical robotics and world leader in image-directed, robotic products for orthopedic applications. The Company's product allows surgeons to pre-operatively plan their surgery in a 3-D virtual space and then execute the surgery in the operating room, exactly as planned.
